Week 1	Week 2	Week 3	Week 4	Week 5	Week 6
01/14/2019	01/21/2019	01/28/2019	02/04/2019	02/11/2019	02/18/2019
Syllabus	Structured Programming	Types of Expressions	Debugging	makefile	Strings
Notepad++	#define	Automatic type conversion	Multidimensional Arrays	Libraries	String Library
FileZilla	Expressions vs Statements	Force type conversion			
PuTTY	lvalue vs rvalue	XOR			
UNIX and Omega	Assignments	Bit Operations			
Your First C Program	Blocks	Bit Masks			
Language Level	Compound Statements	Bit Shifting			
Reserved Words	if	Functions			
Identifiers or Names in C	if-else	Arrays			
The Character Set	Relational Operators	Ternary Operator			
Format of C Programs	Operator Precedence				
	++ and --				
	getchar() and putchar()				
	while				
	logical operators				
	Short circuiting				
	for loop				
	variables in C				
	Integer Bases				
	Integer Types				
	sizeof()				
	Overflow				
	Character Variables				
	Unsigned Types				
	printf() specifiers
